Manager/Sr. Manager, Therapeutic Cell Solutions, Process Development

Lonza is the global leader in primary cells for the research market and cell therapy process development and manufacturing services. Lonza has an immediate opening for a Process Development Manager in our rapidly growing Cell Therapy Business Unit.

This individual will be responsible for managing a lab-based team developing and transferring processes for GMP manufacturing of cell-based therapeutics for external clients. This includes scale-up with closed systems, optimizing key culture parameters, identifying and testing appropriate raw materials, disposables and equipment, and developing and optimizing cell harvest, formulation, and cryopreservation. Candidates should have a Ph.D. in the Life Sciences, Engineering, or related discipline, with 3-5 years of relevant commercial experience, or MS/BS with 10+ years experience in the field. Expertise in therapeutic cell processing and knowledge of FDA Cell Therapy guidances is required. Experience with GMP manufacturing, large scale bioproduction, downstream processing and cell-based assays is desirable. Additional requirements include strong leadership and technology management skills, the ability to interface with clients, and have outstanding communication skills.

Please apply online at www.lonza.com under the career section or submit resumes to sondra.humphrey@lonza.com.
